CAREER OBJECTIVE

A dedicated AI Engineer specializing in machine learning and data science, with a proven ability to develop and implement solutions for real-world problems. Seeking to apply expertise in Python, deep learning, and NLP to deliver data-driven insights and contribute to transformative AI applications.

EDUCATION

M.Tech, Computer Science and Engineering (AI & ML) | Aug 2024 - Present

Rajagiri School of Engineering and Technology | CGPA: 9

B.Tech, Computer Science and Engineering (Artificial Intelligence) | Oct 2020 - Jun 2024

Adi Shankara Institute of Engineering and Technology | CGPA: 8.05

EXPERIENCE

Intern, Mastermine Technologies

Aug 2025 - Present

Engineering a full-stack desktop for photographers using Java, React.js, and Electron.js to streamline album generation workflows.

Teaching Assistant (Part-time), Rajagiri School of Engineering & Technology

Dec 2025 - Mar 2026

Assisted in lab sessions, evaluated student work, and guided UG students in Python programming and DBMS.

Intern, ICT Academy Kerala

May 2023 - Jun 2023

As an Intern at ICT Academy Kerala, I developed a sentiment analysis model for Twitter data using NLP techniques.

PROJECTS

Health Mind AI - Multi-Modal Clinical AI Platform

Developed Health Mind AI, a privacy-first, multi-modal diagnostic platform built on Next.js and FastAPI that leverages local on-device AI and zero-knowledge encryption to deliver clinical-grade medical screenings and secure health monitoring across 11+ clinical specialties.

Ensembled Deep Learning Model for Explainable Diabetic Retinopathy Detection

Developing an automated Diabetic Retinopathy (DR) grading system by fine-tuning state-of-the-art ConvNeXt and Swin Transformer models and developing Uncertainty Aware Hybrid model.

Occlusion based Face Expression Recognition

Developed a hybrid deep learning model (EfficientNetB4 + Vision Transformer) for accurate, occlusion-resistant facial expression recognition, deployed via a Flask web app for real-time and uploaded video analysis.

VideoQuest: Video Q&A and Summarization Chatbot

Built and deployed a web application using Flask, T5, and DistilBERT that allows users to get summaries and ask questions about any YouTube video by processing its transcript.

People counting and tracking system

Developed a crowd management system using OpenCV and YOLOv3 to monitor occupancy and automatically trigger alerts when capacity is exceeded.

SKILLS

Languages: Python, C, C++ , Java, SQL, HTML, CSS, Javascript

AI/ML Concepts: Transformers, CNNs, RAG, Vector Databases

Frameworks & Tools: Git, IntelliJ IDEA, Streamlit, Flask, MS Office

Teaching Interests: AI, Machine Learning, Data Structures, Python, Deep Learning, C Programming

Soft Skills: Communication, Critical and Creative Thinking, Time Management

CERTIFICATIONS

Google Data Analytics Specialization by Coursera (2024)

Prompt Engineering by Infosys Springboard (2025)

Introduction to Generative AI Learning Path by Coursera (2025)

Gen AI for UI/UX Designers by Coursera (2025)
